

Chemicals for the Future

We develop, manufacture and sell chemical products, primarily for automobiles.
 Each product type that we offer is the end result of moving forward hand-in-hand with our customers over the years.
 Mindful to develop products that are not only high-quality but also people-friendly and in harmony with the global environment, we will continue to produce the next-generation chemical products needed for the future.

Philosophy

Company creed : Harmony

Guiding Principles (the 3C)

CHALLENGE
 Challenging the future with continuously refined technologies to grow into a world-leading company.

CREATION
 Creating a safer, more comfortable lifestyle through products and services that exceed expectations.

CONTRIBUTION
 Contributing through craftsmanship to the realization of a sustainable environment and society.

Mission

From Japan to the world, creating the future through the power of chemicals, providing a safe and comfortable lifestyle

SUSTAINABILITY

Toward the realization of a decarbonized (carbon neutral) society

JCI will contribute to creating an earth-friendly and sustainable society by thorough "energy-saving action" and "renewable energy installation" JCI will actively take initiatives toward the realization of a completely carbon-neutral supply chain under Scopes 1 & 2 as well as Scope 3. JCI has achieved the goal of "100% Renewable Energy" for electricity used by JCI headquarters as of April 1, 2022. Thanks to this, we have managed to cut the amount of carbon dioxide emitted by the entire JCI headquarters by 80%. Furthermore, JCI aims to "achieve zero net carbon dioxide emissions" at its factories. In addition, in its overseas activities, JCI will make efforts toward "net zero carbon emissions from its factories worldwide."

Initiatives for SDGs

Japan Chemical Industries intends to meet the expectations of its stakeholders by contributing to the achievement of a sustainable society, through the development and provision of products that create a safe, comfortable lifestyle. Realization of the SDGs, which aim to create a better, sustainable society, is also consistent with our company creed's aspiration of "Harmony." We believe that initiatives for the SDGs through our businesses also enhance our corporate value, so we plan to actively engage in such initiatives.

TIANJIN JCI CO.,LTD (China)

Establishment : 2005
 Address : No.16, Siwei Road, Dongli Economic Development Area, Tianjin
 Business Fields : Development, Manufacturing and Sales of chemical product for automobile

COMPANY PROFILE

[Outline]

Company Name JAPAN CHEMICAL INDUSTRIES Co.,Ltd.
Address 813 Kikkawa, Shimizu-ku, Shizuoka-shi, Shizuoka 424-8558 JAPAN
Date of Foundation April 3, 1962
Capital 100 million yen
Stockholder CCI Holdings Inc. 100%
Number of Employee 86 (at the end of March, 2024)
Financing Bank of Mitsubishi UFJ Shizuoka Bank
Executives Chairperson Tetsuya Okabe
 President Manabu Ozawa
 Senior Managing Director Michihori Hori
 Managing Director Masaaki Matsunaga
 Director Makoto Ooya
 Director Hideki Masuoka
 Director Yasuaki Mori
 Audit & Supervisory Board Member Nobuhiro Yamada
Business Fields Development, Manufacturing and Sales of chemical product for automobile
 Development, Manufacturing and Sales of chemical product for building maintenance
 Restoring used parts of automobile
Overseas Group Company PT.NIHON CHEMICAL INDONESIA(Indonesia)
 TIANJIN JCI CO.,LTD(China)

[History]

1962 Company founded, manufacturing and selling petroleum products, Headquarters: Kyobashi, Tokyo/ Factory: Numazu City, Shizuoka / Capital: 10 million yen. (First President Shotaro Kamiya)
 1965 Factory relocated to Shimizu City, Shizuoka (present Shizuoka City, Shizuoka).
 1970 Headquarters relocated to Shimizu City, Shizuoka.
 1971 Certified Engine Antifreeze Coolants by JIS.
 1981 Certified Long Life Coolant by JIS.
 1982 Inauguration of chairman Keiichiro Kuroda
 1990 Opened a Head office and Laboratory building.
 1997 Established subsidiary PT.NCI (NIHON CHEMICAL INDONESIA) in Indonesia.
 2001 Certified ISO14001.
 2005 Established subsidiary TIANJIN JCI CO.,LTD. in China. Certified ISO9001.
 2007 Certified Long Life Coolant and Brake Fluid by JIS.
 2011 Opened 2nd Windshield washer fluid factory.
 2012 50th anniversary of the foundation
 2018 ISO9001-14001: Obtained the authentication of 2015 edition.
 2023 Group member of CCI Holdings Inc.

JAPAN CHEMICAL INDUSTRIES

New Energy Vehicles Products

High performance coolant for electric vehicles and fuel cell vehicles

Coolant for Electric Vehicles (EV Coolant)

Our EV Coolant plays an active role in cooling the battery, which is a core component of an EV, as well as various other parts such as the motor and inverter. Automakers use JCI's EV Coolant for factory filling and a genuine aftermarket products. With high performance proven through various strict evaluation tests, our products support green energy vehicles society.

Coolant for Fuel Cell Vehicles (FCV Coolant)

JCI's FCV Coolant performance has been proven through various strict tests. Car manufactures use it for factory filling and genuine aftermarket products all over the world.

Automotive Parts Cleaning

Not only selling the cleaning chemical product but also cleaning clients' parts directly

Parts Cleaning Business

Utilizing technology and know-how built up over our many years of experience as a manufacturer of automotive chemicals, JCI is developing original cleaners as well as cleaning and testing rebuilt parts for small, medium and large trucks. This rebuilt-parts cleaning business is not just useful for our customers—it's also environmentally friendly. JCI will continue to focus on this as a key business capable of contributing to the creation of a sustainable society.

Sales of parts-cleaning chemicals

We believe that current cleaning chemicals cause a variety of problems for many customers due to poor cleaning performance, damage caused to parts, etc. JCI will do its utmost to resolve these issues by developing a cleaner that meets the needs of such customers.

Automotive Chemical Products

Advanced technology specialized for car maintenance makes the car comfortable

Coolant

As a result of the upgrade in engine performance, conditions under which coolants are used are becoming more severe. Our coolant has an excellent effect for cooling and anticorrosion, as well as the excellent ability to protect the whole cooling system against rust and corrosion for a long time. The engine performance will, therefore, be enhanced to the maximum level. The performance of our coolant, which has been verified through various severe tests, has been highly appreciated by industry leaders. Many car manufacturers have been using our coolant for factory filling and have designated them as genuine products all over the world.

Wax

We have a wide range of products that cover from daily care to professional use.

Vitreous Coating(Windshield)

We started the development/sales of vitreous coating, which gives water repellent effect to windshield, more than 20 years ago. We meet the expectancy of customers such as car manufacturers and so on by continuing improvement of workability and effect/endurance mainly for professional use.

WWF(Windshield Washer Fluid)

Our products are contributing to driving safety by securing clear eyesight of driver not only by their anti-freeze effect but also by the excellent cleaning performance to cleanly remove contaminations, such as dirt from the road attached to windshield, oily and soot deposit from exhaust gas, wax content shed by rainwater.

Fuel Additive

This product has been sold all over the world and has attained a reputation of the highest level in every country for its excellent quality and efficiency. Because this fuel additive is blended with a high-efficiency cleaning agent and special solvent, this removes deposits from combustion chambers and spark plugs just by pouring this into the fuel tank. The high performance of the engine will come back, acceleration fuel efficiency will be enhanced, and you will feel all of these together with cleaner exhaust gas. Many car manufacturers have designated this their genuine product, and the efficiency of this product has been verified through various tests and has been highly trusted.

Additive for Cleaning Engine

This is one of our very popular long-selling products. The high efficiency of the special cleaning agent will help efficient removal of sludge or varnishes that disturb the smooth flow of oil inside the engine. Because this does not use any solvent, this is free from any concern for damage to the engine during the cleaning.

Engine Oil Additive

This is an additive for engine oil that forms a strong coating on the metal surface. Reduced friction and abrasion between engine components will enhance engine performance. Please enjoy driving with a quieter sound and brisk acceleration of the engine.

Car Washing Machine Chemical

These are the chemicals for car washing machines that have high quality and are capable to meet the requirements for genuine products of many manufacturers. Our product line includes car shampoo, foam, wax, rinse, water-repellent coating and water-repellent shiny coating.

Sanitary Chemical Products

Keep your car clean with antibacterial, disinfectant and deodorizing effects

Sanitary Chemical Products

In order to enjoy a comfortable car life, it is essential to improve the environment inside the car. We are developing anti-virus and anti-bacterial agents, anti-bacterial and anti-fungal agents, and deodorizing and disinfecting agents inside air conditioners for automobile interiors, which have long-lasting effects as sanitary chemical products for automobiles.

Wet wipes &Antibacterial agent

Line up wet wipes and antibacterial agents that are convenient for daily maintenance. Our products developed for automobile interiors can support creating a clean environment inside the car.

Factory Filling Chemical Products

Supply to auto factories all over the world

We have been supplying a variety of chemical products to factories, such as Long Life Coolant and Windshield Washer Fluid, for car manufacturers all over the world. We will deliver high quality products to factories in the appropriate delivery time to support the customer's production activities. We accept any lot size of delivery from small to as large as tank trucks.

Building Maintenance Chemical Products

Clean the office and hotel with professional technology

Originally developed cleaning and coating technologies keep surface clean, beautiful, and free from dirt.They will cover wide range of needs from building to standard homes.
